EDUCATION

University of California, Irvine

Irvine, CA

Bachelor of Science in Computer Science

Expected Graduation: June 2027

- 3.41/4.00 GPA
- Relevant Coursework: Data Structures, Algorithms, Database Management, Artificial Intelligence, Machine Learning, Automata Theory, Information Retrieval, Software Engineering, Linear Algebra, Discrete Mathematics

EXPERIENCE

Software Engineering Intern

July 2025 – August 2025

Beach Point Capital Management

Santa Monica, CA

- Developed a generative AI agentic chatbot that synthesizes financial information based on internal company documents, providing in-text citations and customizable search settings
- Built a full-stack application in C#/.NET by designing the UI/UX, developing a Blazor frontend, configuring a RESTful API, and connecting to a Flask backend that interfaces with co-intern backend functions
- Collaborated with co-interns and supervisor to research existing projects and design a unified platform, consolidating multiple related systems into a single, streamlined solution
- Redesigned the entire codebase to enhance structure, improve readability, and enforce separation of concerns
- Created shared components that strengthened modularity, improved UI consistency, and reduced code duplication

Projects Committee Software Developer

November 2024 – Present

Information & Computer Science Student Council (ICSSC)

Irvine, CA

- Contributing to PeterPortal, a site thousands of UCI students use to research courses and plan a 4-year roadmap
- Building new features and enhancing existing ones, improving both frontend usability and backend performance
- Participating in collaborative GitHub workflows through code reviews and pull requests, ensuring reliable code
- Refactoring the codebase to boost scalability, reduce technical debt, and support long-term maintainability

Club Webmaster

May 2025 – Present

Anteater Adventure Club

Irvine, CA

- Developing a website for a 600+ member club, optimizing performance for an extensive photo collection
- Implementing event management features, enabling members to view upcoming event details and RSVP online

PROJECTS

LeetCode Calendar | *React, Vite, TypeScript, Tailwind CSS, GraphQL, Resend*

March 2025

- Developed a browser extension that displays a user's LeetCode submission history each time a new tab is opened
- Integrated with LeetCode's GraphQL API to fetch and parse user data, rendering an interactive activity calendar
- Published the extension on both the [Chrome Web Store](#) and [Firefox Add-Ons page](#), reaching cross-browser users

UCI App Catalog | *React, Next.js, TypeScript, Tailwind CSS, Vercel, Resend*

February 2025

- Developed a centralized catalog of UCI-related applications, making it easier for students to discover useful tools
- Implemented search, filtering, and favoriting features, enabling users to quickly find and save relevant apps
- Configured automated email notifications to streamline the process of user requests for new app submissions

Marlin | *React, Vite, TypeScript, Tailwind CSS*

October 2024

- Created an LLM-powered chrome web extension that detects phishing attacks in emails
- Designed and implemented the web interface of the extension popup, ensuring a concise overview of risk assessment
- Won the Cybersecurity track out of 300+ participants at LA Tech Week 2024's Cerebral Beach Hacks

TECHNICAL SKILLS

Languages: Python, C#, TypeScript, JavaScript, HTML/CSS, SQL

Frameworks: React, Next.js, Vite, Tailwind CSS, SASS, tRPC, Flask, .NET, Blazor, MudBlazor

Developer Tools: Vercel, Resend, Azure, RESTful APIs, GraphQL

Other Interests: Soccer, Boulderling, Long-Distance Running, Politics, Linguistics, Geography
